### REASONS FOR ALLOWANCE

1. Claims 13-17 are allowed. The following is an examiner's statement of reasons for allowance.

2. Regarding claim 13 and in light of Applicant's persuasive arguments (see the last paragraph on page 6 through the first full paragraph on page 7, filed on July 30, 2007), the prior art fails to disclose or fairly suggest a gating device to delimit an x-ray beam, including absorber elements having an absorber element edge shaped to give a slit a slit width that varies in a longitudinal direction of the slit, said slit width increasing outwardly, from a central position, toward respectively opposite ends of said slit, each slit edge, in said longitudinal direction of said slit, having a middle region producing a uniform width of said slit, and further regions respectively disposed on opposite sides of said middle region that produce a linearly increasing slit width in said longitudinal direction of said slit; and an adjustment device producing a parallelogram-like relative movement between said absorber elements, in combination with all of the other limitations in the claim. Claim 14 is allowed by virtue of its dependency.

3. Regarding claim 15 and in light of Applicant's persuasive arguments (see the last paragraph on page 6 through the first full paragraph on page 7, filed on July 30, 2007), the prior art fails to disclose or fairly suggest a computed tomography apparatus, including a gating device including absorber elements having an absorber element edge shaped to give a slit a slit width that varies in a longitudinal direction of the slit, said slit width increasing outwardly, from a central position, toward respectively opposite ends of said slit, each slit edge, in said longitudinal

direction of said slit, having a middle region producing a uniform width of said slit, and further regions respectively disposed on opposite sides of said middle region that produce a linearly increasing slit width in said longitudinal direction of said slit, and an adjustment device producing a parallelogram-like relative movement between said absorber elements, in combination with all of the other limitations in the claim. Claims 16 and 17 are allowed by virtue of their dependency.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
